In the spirit of economic development: Did you know?

- Money spent at local businesses generates 3.5x more wealth for the local economy compared to money spent at big box stores.
- Shopping locally helps cut down on processing, packaging and transportation waste, leading to less pollution.
- Local business generates 70% more local economic activity per square foot than big box retail.
- Local, independent makers are more likely to reuse materials.
- If every family in the U.S. spent an extra \$10 a month at a locally owned, independent business instead of a national chain, over \$9.3 billion would be directly returned to our economy.
